

Presents
Course # 244

Concrete Batch Plants

Concrete is a mixture of water, cement, sand, gravel, and other substances designed to harden and form durable surfaces and structures. A batch plant is a facility that collects and stores concrete ingredients, selects and combines proportions, and dispenses the mixture into a mixer-truck. This one-day course covers process and control, air pollution control measures, inspection procedures, and legal requirements applicable to concrete batch plants. In order to participate in the field visit, all students are required to bring appropriate safety equipment (hard hat, safety shoes, long sleeved shirt, and hearing/eye protection).

June 30, 2005
8:30 am - 5:00 p.m.
San Joaquin Valley APCD
1990 Gettysburg Ave
Fresno, CA 93726
